

NFTA Logo Use Statement

The NFTA logo is a trademark of the National Forage Testing Association. The use of the NFTA logo is strictly reserved for use by those labs having current certification of the NFTA. The authorized logo has the year and method of certification indicated on the logo. Use of the logo by labs on reports, web sites, marketing materials or in other commercial applications is prohibited without current passing certification status.

Use of the NFTA logo by entities other than certified laboratories may be requested by written request of the NFTA Secretary and NFTA board approval.

If a lab loses certification or discontinues the NFTA program it must remove the NFTA logo from its materials until certification is reestablished.

Certification is by laboratory location. Multiple laboratory locations must each maintain certification in order to claim certification. Within location multiple instruments are assumed to be certified at that location.
